Redefining Overhead Conveyors

Machining Centers

IntelliTrak's Role in Machining Systems

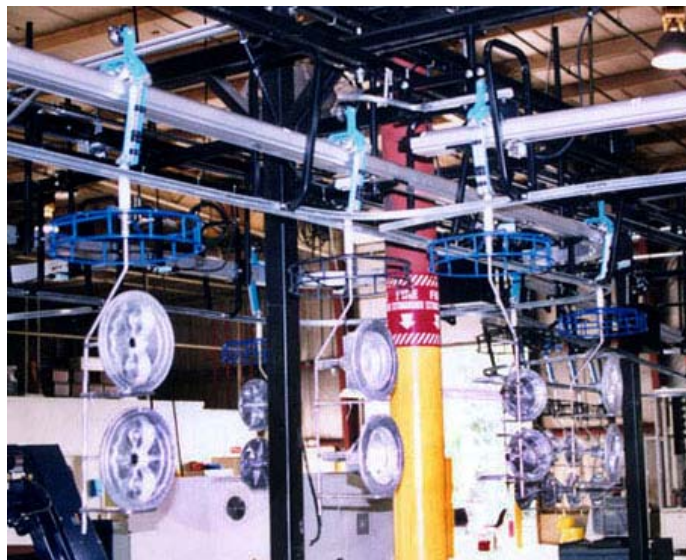

OCS IntelliTrak, Inc. has redefined overhead conveyor systems by utilizing a rotating tube to drive loads up to 1,000 lbs. These **modular, highly flexible** systems incorporate both driven and non-driven lines to **maximize efficiency and effectiveness**. Compared to traditional *overhead power & free*, IntelliTrak is:

- Lower Cost
- Lower Maintenance
- Cleaner
- Quieter
- Modular
- Inherently Safer
- Highly Configurable

Load capacities are as follows:

| | 100 Series | 500 Series |
|------------------------|------------|------------|
| Single Trolley Carrier | 100 lbs. | 500 lbs. |
| Dual Trolley Carrier | 200 lbs. | 1,000 lbs. |

The addressable trolleys and the ability to automatically travel to a particular work area (such as machining, cleaning, quality control, assembly, etc.) have made IntelliTrak the best choice for those production and assembly applications where significant labor cost reductions are important. Long or

Release parts to a holding area in front of any Machining Center from a single load station

Your Overhead Power & Free Solution

IntelliTrak's Design is Intelligent

Send machined parts to other operations (additional machining, cleaning, washing, paint, inspection, assembly, etc.) by setting the address tabs on the trolley.

The design of an IntelliTrak system makes it possible to accomplish multiple functions with one single conveyor in your distribution center system. You will have the capability to:

- Change processes or destinations of products on the fly
- Set up in-line speed changes
- Run trolleys both forward and reverse simultaneously
- Stop a carrier for processing without stopping the entire line
- Easily incorporate vertical lifts
- Dip into tanks
- Negotiate inclines and declines
- Accumulate loads in-line
- Have both driven and non-driven line in the same system
- Reduce maintenance

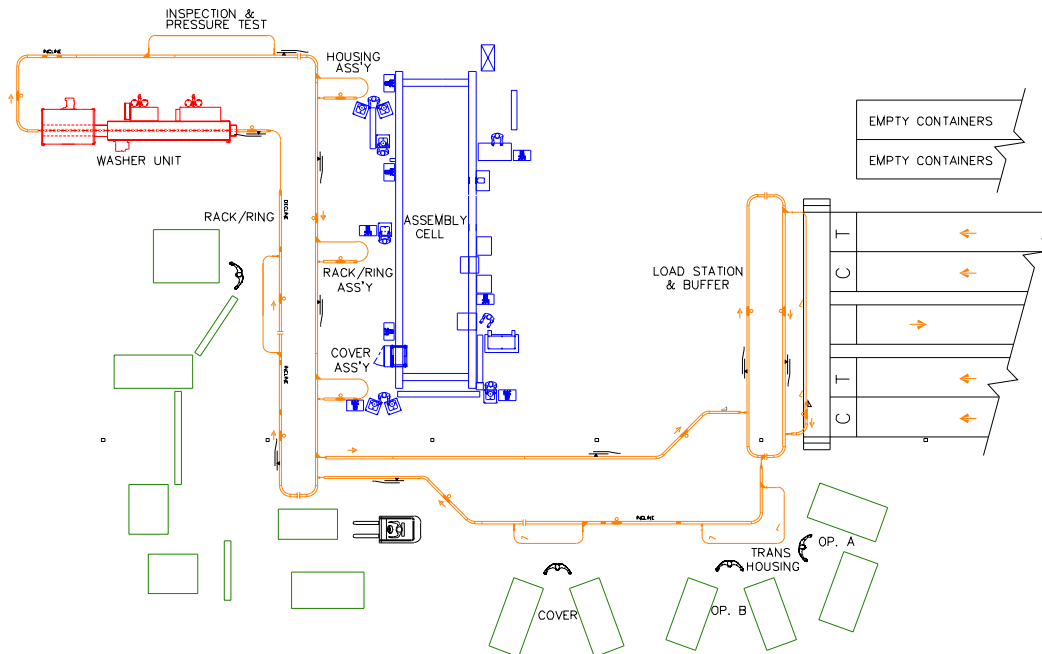

This application manufactures complete appliance transmissions. The IntelliTrak System handles the parts from loading of rough castings through machining processes to cleaning, inspection, and on to final assembly.

Our IntelliTrak engineers are available to help you design your system to maximize profits.

IntelliTrak's Return on Investment

You will realize increased production because IntelliTrak allows your personnel to be more efficient. The typical payback on your investment in IntelliTrak is exceptional with a 6 to 18 month return.

Not only does IntelliTrak deliver product and service – it delivers profits.
